Certifications

Google Data Analytics Certification

AI-native operator and insights generator with 7+ years in **financial services**, including 4+ at Toast through scale-up. I build and operate **multi-agent systems** with **Claude Code** and **Cowork**, ship **LLM-powered tools** through Ghost Strategies, and **build automations** that eliminate recurring workflows. Daily **SQL (Snowflake)**, and **Hex** dashboards, with **financial modeling** in **Google Sheets**.

Skills

• AI Implementation & Tool Building

• SQL (Snowflake)

• Data Visualizations

• Cross-Functional Partnership

• Strategic Insights & Analytics

• Python

• Multi-Agent Systems

Work history

Technical Projects

Browser-Based Analytics Terminals (Built with Anthropic's Claude)

- Built **Training Terminal**, a **gamified learning environment** for practicing **Python (Pyodide)** and **SQL (sql.js)** in the browser with **100 hand-authored questions** across **five gated tiers** (Introductory through Master), live **KPIs for accuracy, streaks, and session time**, and **localStorage-persisted progression** deployed as a single static file
- Built a **high-volume asset tracking terminal** on a **Python FastAPI backend**, with an **automated data pipeline** using **GitHub Actions** for **weekly serverless CI/CD workflows**

AI-Assisted Financial Modeling & Evaluation Suite (Built with Anthropic's Claude)

- Built **dynamic financial engines** including a **probability-weighted valuation model** and a **\$3M TRS retirement planner**, owning the **financial logic and architecture** while directing Claude to generate the code
- Validated every output against standard financial formulas**, catching **calculation errors** and refining the prompts until the math held up, while only prompting Claude with **test or sample data** to keep proprietary information out of the model

Toast Inc

Senior Capital Underwriter, Process Automation | Remote, TX | December 2021 - Current

- Use **Claude Code** and **Cowork** at Toast as part of the rollout to a select group of process automation specialists, where I built a **multi-agent system across both surfaces** with an **orchestrator** that routes work to **specialized sub-agents** (workflow automation, code audit, technical PM, devops, technical writing), each with its own system prompt, **scoped tool access**, and **isolated context**
- Identify recurring questions and manual workflows, then **build scalable automations** to eliminate them, including a **full-stack case management web application** using **Google Apps Script, HTML/CSS/JavaScript**, and **Chart.js** with **real-time analytics** across **700+ active cases**
- Generate **strategic insights** for senior leadership by analyzing **transactional and sales data**, building **projections** on default probability, and surfacing **contingency scenarios** (billing holds, downward sales trends) that precede higher **default rates**

- Designed and shipped a **cross-platform email template automation suite** (macOS and Windows) using **Python, Flask, PowerShell, and JavaScript** that cut retrieval from 30 seconds to under 3 seconds for the **14-person** Capital Underwriting and Change of Ownership team, with **zero AI tokens consumed** and **zero customer data exposure** by design
- **Spearheaded a 0-to-1 operational strategy** by running a time study, building an **efficiency and ROI analysis**, and shipping a **70% operational improvement** through automation, partnering across Product, Engineering, and Operations to ship the change end-to-end
- Authored complex **SQL queries in Snowflake, Salesforce reports**, and automated **Hex dashboards** to self-serve commercial data, surface **performance trends**, and deliver **real-time insights** into portfolio and operational health across **\$400M+ in capital deployments**
- As a senior on the team, **trained 5 team members** through onboarding and built the team's **new hire program, policy/SOP/training index**, and **training video library** to scale capability and accelerate ramp

Torres Financial Services, Inc

Portfolio Management Advisor | San Antonio, TX | 2019 - 2021

Junior Analyst | San Antonio, TX | 2017 - 2019

- Assessed portfolio data to **develop KPI dashboards** to support risk strategies, budgeting, and long-term financial planning
- **Guided the implementation of new solutions** by presenting executives to **deliver strategic insights** using internal data and industry benchmarks to **influence key business** and investment decisions
- **Streamlined and managed reporting processes** through automation and live feed data for **real-time analysis** to enable faster and accurate decision making
- **Conducted comparative analyses of historical and current earnings data**, establishing **data-driven recommendations** that drove long-term financial initiatives and improved overall portfolio performance
- **Collaborated with compliance and risk teams** to ensure adherence to financial regulations and strengthen risk management

Education

Bachelor of Business Administration in Finance

The University of Texas At San Antonio, San Antonio, TX
